

Training Services from SOLID Applications Ltd. Solid Edge® Assembly

Training fact sheet

www.solidapps.co.uk

- ▶ The 3-day Assembly course is targeted at the novice to intermediate user who will create assemblies from Solid Models. The class will cover all of the commands available in the assembly environment along with two assembly methods: Top-Down and Bottom-Up.

Course: Assembly
Code: SA-TR12
Duration: 3 Days
Cost: £950 + VAT
Venue: Oldbury

Course Overview

Users will learn how to assemble and edit parts that already exist, and how to create a part within an assembly. Specialised Topics such as Exploded views, 3D Section views, Simply motion and XpresRoute will also be explained.

Benefits

Gain skills that add value to your business.

Learn from the experts, with someone on hand to help.

Keep up-to-date with Solid Edge and best practices.

Increase your Solid Edge knowledge to boost your efficiency.

Opportunity to identify and solve specific problems.

Includes extensive courseware.

The course has a completely hands-on approach with each delegate at his or her own Workstation. A SETA certified trainer guides the delegate through a series of exercises over the three days
